Fri 15-Apr-25 10:28 AM

Hi all,

With exams just around the corner, ELSOC has for you another cracking newsletter produced by our wonderful publications team!

-- WEEK 9 NEWSLETTER --

Hey everyone, welcome to week 9! We're at that time of term when everything starts to get a little bit much, so it's OK to feel overwhelmed. Make sure to give yourself those little pockets of rest between the busyness.

Taking those short breaks, even if it's just ten minutes of resting your eyes instead of doomscrolling between tasks, can make a big difference. Keep at it!

Here's the rundown on what's been going on in Elsoc and what we've got coming up!

UPCOMING EVENTS !

Verilog Workshop

If you're struggling with ELEC2141 and want more preparation before the lab exam, come along to our Verilog workshop 💻

Toshiba Industry BBQ

Do you want the chance to talk to industry representatives from one of the biggest engineering companies in Australia?? Then come along to our TOSHIBA Industry BB

Q

LAST WEEK'S EVENTS !

Here are some of the past events that we've put together over the past couple of weeks 🎉🎉🎉

Games Night

Our games night brought out the competitive spirit in everyone, with all of our favourite board games and snacks!

RL / RC Workshop

We got hands-on with inductors and capacitors in our RL/RC circuits workshop, it was helpful preparation for the upcoming final exam!

Hide & Seek

We took over campus for a high-stakes game of hide and seek, it was so much fun catching up with everyone!!

INDUSTRY OPPORTUNITIES

AtomCraft

Our friends over at Atomcraft are also recruiting for next term. Here's a message from them: AtomCraft is recruiting for T2 2025!

- Want to be a part of something new and exciting? 📰

- Want to meet like-minded people and apply your university skills 📝?

- Well, AtomCraft is recruiting!

AtomCraft is a vertically integrated project that seeks to deliver the world's first tokamak entirely designed, built and operated by students.

We're looking for students across all engineering and science disciplines interested in nuclear innovation! You will work on developing critical solutions to assist in the design and development of a nuclear fusion device.

All students science and engineering students from second year onwards are invited to apply for a project in The ChallENG Program as General Education Electives.

Apply now at https://www.unsw.edu.au/challeng/vertically-integrated-projects/explore-vertically-integrated-projects/atomcraft

If you have any questions, feel free to write to AtomCraft's social media pages.

Kind Regards,

Andrew Chung | **he/him** | **President**
