SCHOOL OF ELECTRICAL ENGINEERING
AND COMPUTER SCIENCE

Robert T. Smith

I have been acquainted with Robert Smith as his final year thesis supervisor for the 1985 academic year.

For his project Mr. Smith designed and implemented a high-speed communication interface for the Texas Instruments TMS32010 digital signal microprocessor evaluation module. For this work he achieved the grade "CREDIT".

Mr. Smith applied himself assiduously to his task, unrelenting in the face of problems and always keen to research and devise improvements. I found him a pleasure to supervise. He maintained detailed records of his work and plans, of which he kept me regularly informed.

He gets on well with his colleagues and with the staff, and has served his fellow students as President of ELSOC, the Undergraduate Electrical Engineering Students Society in this School.

Robert Smith has been one of the hardest working and most serious students in near one hundred I have supervised.

R. Radzyner
Senior Lecturer in
Electrical Engineering
and Computer Science
