

President

Andrew Chung 2nd Year

I would love the opportunity to become the president of ELSOC as I believe I have the necessary skills and experiences to positively grow the society internally and externally. I am highly capable to lead and direct a team of likeminded individuals, possessing skills such as flexibility and communication which is the backbone of a cohesive and successful team. I'm extremely passionate about this role and I want to genuinely give back to the school and students of EE&T, leaving a significant impression on the society. I have had two wonderful years of experience in ELSOC as both socials subcommittee and executive which has allowed me to gain a full perspective on the operations of ELSOC.

Vice President

Sophia Wiggins 2nd Year

ELSOC is an important connection between industry, academics, and social life, and it is a community I would love to lead. With two years of vast society experience across a range of portfolios, I am both capable and eager to further strengthen the positive impact that ELSOC has on students. I strive to lead by example through dedication, initiative and a positive attitude to ensure that no matter the event, everyone can walk away having gained something. This society has given me so much through mentorship and community, and I would love to give back as Vice-President for 2025.

Secretary / Treasurer

Shiel Priyanath
2nd Year

I am nominating myself for Treasurer because I understand the high level of responsibility the role has and how critical the work of the treasurer is in ELSOC's functioning to provide value to our community. I have a keen eye for detail and finding ways to optimise and through my role as a HR director I have experience working with the internal team, managing finances and providing reimbursements for groups up to 50 people, all of which will help me fulfil the duties of a treasurer. My goal as treasurer is to find effective ways to minimise costs and increase the funds available so that ELSOC can provide new, improved and valuable events for our cohort. If you share the same vision as I do, I would love your support in growing ELSOC.

Socials Executive

Liam Mitchell **1st Year**

Coming from a rural part of NSW, joining ELSOC has helped me significantly with building friendships and feeling like I belong to a community and group within UNSW. Through the role as Socials Executive, I wish to give back and make other students feel welcome and further build a sense of belonging that this society already creates. I hope to build on the events that occurred this year and make next year even bigger and better. As a current subcommittee member of the Academics portfolio in ELSOC, I have attended and helped out with close to all of the events that we have run and have tried to ensure that everyone has some fun and that us students can catch a break every now and then to make Uni life a little more fun than just the daily grind.

Industry Executive

Jerry Yan
2nd Year

I have been part of ELSOC's Industry team for the better part of two years now as a subcommittee member, and as a director. During this time, I have become extremely competent in completing the various tasks that are required of an Industry Executive. I understand how to work with my team to not only obtain sponsorships, but also coordinate with sponsors to run interactive events where students can learn more about industry. I believe these skills would be extremely valuable in my goal as an Industry Executive to effectively connect students with real-world companies.

Academics Executive

Otto Ohis
2nd Year

The role of an academics executive is to support the growth of members in their academic and educational endeavours through their leadership of the Academics team. This is including but not limited to planning revision workshops, but also study sessions and relevant collaboration events. Through my experience as an Academics director for MathSoc and as the Mathematics director for CPMSoc, I have led, hosted and presented academic events ranging from competitions to workshops to the recent Math1B Super Revision Day in collaboration with PASS. As a second year going into third year electrical engineering, I hope to apply and sustain this diligence in ELSOC. Thanks for reading this, hope you have a fantastic day :DD

Creatives Executive

Kaira Dumasia
2nd Year

Through two years of active involvement in various society roles, I have developed many new skills in various different things. With a fresh perspective on creative strategy and media execution, I am enthusiastic about the opportunity to contribute to ELSOC as the Creatives Executive. In this role, my goal is to enhance ELSOC's visual and digital presence by crafting engaging content that resonates with our members and the broader community. I aim to use my skills to create engaging social media posts and innovative media campaigns that highlight events and achievements. By utilising modern design trends and media strategies, I plan to capture the essence of ELSOC's activities and amplify our reach. ELSOC has provided a supportive environment and invaluable experiences. I am enthusiastic about the opportunity to give back by bringing fresh, creative ideas to the table in 2025.

Human Resources Executive

Shuruthy Dhushiyandan **2nd Year**

I believe I am well-suited for the role of HR Executive in the UNSW Electrical Society due to my extensive involvement and leadership within the society and beyond. As the HR Director of ELSOC 2024, I have gained valuable experience in organising events and fostering a supportive environment for students. My role as one of the head organisers for the ELSOC Peer Mentoring Program allowed me to mentor first-year students, helping them integrate into university life and providing essential support. Moreover, I have been a key organiser of the 2024 society road trips, working with my port to plan fun and memorable trips for the team to enjoy. I have further taken the initiative to start new traditions within the society such as our iconic shot board, and Women in Engineering Empowerment Wall. My ability to not only take initiative in planning these events, but also lead and take care of the team to create an inclusive and kind environment would make me the perfect candidate as next years HR Executive.

Public Relations Executive

Tash McBride
3rd Year

I'm a 3rd year Electrical Engineering student and am interested in applying for Elsoc Public Relations Executive for 2025. I have lots of experience with marketing from being on the Elsoc marketing subcommittee and the Marketing Executive for UNSWifties last year. I was also the founding president of another UNSW student society, so I have a lot of experience with supporting a team and involvement in UNSW club culture. I'm excited to hopefully get the opportunity to work with a new team in 2025!

Workshops Executive

Joshua Chan
2nd Year

Hi, I'm Josh, and I'm excited to run for Workshop Executive at ELSOC. I have a real passion for creating and working with electronics, and I'm confident I can bring fresh energy and innovative ideas to our workshops.

My experience includes leading the rUNSWift robotics team, organising various events at UNSW, and developing cool projects like an autonomous vehicle, a RF transceiver and a smart tabletop display. These roles have helped me build strong leadership skills and hands-on technical expertise. Plus, I'm familiar with how UNSW clubs and Arc UNSW operate, so I'm ready to get started right away and milk all the benefits from them.

I'm dedicated, organised, and eager to make our workshops more engaging, interesting and technical. I would be honoured to have your vote. Let's achieve great things together at ELSOC!
