Claude optimized my LinkedIn profile in 10 minutes.

No copywriter.

No personal branding consultant.

No \$500 resume service.

Just:

One LinkedIn PDF

One Claude prompt

Extended Thinking turned on

Most people think

their LinkedIn profile needs a total rewrite.

Usually it just needs:

Better positioning

Stronger keywords

Clearer experience bullets

A headline that actually gets attention

Here's the exact process

STEP 1 — Export your LinkedIn profile as a PDF

--> Go to your profile on desktop

--> Click "More"

--> Click "Save to PDF"

STEP 2 — Open Claude AI

--> Go to Claude.ai

--> Select the Sonnet model

--> Turn on Extended Thinking

STEP 3 — Upload your LinkedIn PDF + paste this prompt

"Act like a LinkedIn growth strategist.

Review this profile and identify what's reducing visibility, credibility, and opportunities."

Identify gaps in: Headline, About, Experience, Skills. Ask clarifying questions about my goals. Then optimize each section using:

--> XYZ formula for Experience (I accomplished X by doing Y, resulting in Z)

--> 3 bullet points max per role

--> ATS-friendly keywords."

STEP 4 — Answer Claude's questions

--> The better your answers, the sharper the output

STEP 5 — Collect your optimized profile

--> A stronger headline

--> A rewritten About section

--> Better Experience bullets

--> Keywords and skills you were missing

STEP 6 — Refine anything that doesn't fit

--> "This About section is too long. Cut it to 5 sentences."

--> That's it. One follow-up prompt.

STEP 7 — Update your LinkedIn profile

- > Copy the optimized sections
- > Paste them into LinkedIn
- > Make small edits if needed

Total time: 10 minutes

AI didn't replace personal branding.

It removed the hardest part:
starting.

Most profiles stay outdated because:

It feels overwhelming
People overthink every sentence
They keep delaying the update

Now you can fix that in minutes.

Here's your action plan

Save this post
Export your LinkedIn PDF today
Run the AI audit this week

10 minutes.
Better positioning.
More opportunities.

Athletes already know how to win in business.

Most just stop using the skills that made them dangerous.

10 traits of ex-athletes who actually make it in business

I've watched hundreds of athletes make the transition.

Some kick on fast.

Most stall for years before they find their footing.

The ones who move quickest share the same traits.

Habits the changing room already taught them.

Right, so here's the list:

1. They don't wait to be told what to do
 - > Sport taught them to read the play.
 - > They bring the same instinct into business.

2. They stay out of office politics
 - > Drama wasn't tolerated in the dressing room.
 - > They focus on the scoreboard instead.

3. They fix problems instead of flagging them
 - > No coach wants a player who only points.
 - > They show up with a solution attached.

4. They admit what they don't know
 - > Then they learn it faster than anyone.
 - > Pride costs you reps you can't afford.

5. They turn ideas into action quickly
 - > Talking about it never won a match.
 - > Doing it badly beats planning it perfectly.

6. They listen properly before they speak
 - > Captains learn this before they wear the armband.
 - > It's the same skill in any boardroom.

7. They use data but trust the gut too
 - > Stats tell you what happened last week.
 - > Instinct tells you what to do next.

8. They finish what they start
 - > Half-finished projects are the silent career killer.
 - > Athletes are wired to play the full 80.

9. They make the team better, not just themselves
 - > Lifting others up never goes unnoticed.
 - > The best leaders pull, they don't push.

10. They write things down and review weekly
 - > Goals on paper. Numbers tracked. Friday review.
 - > Same system that got them to the top of sport.

Your sport gave you the operating system.
Use it.

You don't need to become someone new.

Just stop pretending the dressing room didn't teach you anything.

It taught you everything.

Which one of these did sport teach you best?

Post- LI CarolynF 260610 - 10 Emotional Intelligence Skills that AI Will Never Replace

https://www.linkedin.com/posts/cdfrost_everyones-worried-ai-will-replace-them-share-7469954435952050176-Wa5f/

7h •

Everyone's worried AI will replace them.

These 10 skills make you irreplaceable:

The future belongs to people who master what machines can't replicate.

10 EQ skills AI will never replace

1) Reading the unspoken tension in a room
--> Noticing when someone's "I'm fine" means they're not fine at all.

2) Knowing when to break your own rules
--> Sometimes policy matters less than people. Humans know the difference.

3) Giving feedback that actually helps people grow
--> AI can identify problems. Only humans can deliver criticism with care.

4) Building trust through vulnerability
--> Sharing your own struggles creates connection machines can't manufacture.

5) Navigating complex workplace politics
--> Understanding who really makes decisions and how relationships work.

6) Inspiring people to do their best work
--> Motivation comes from human connection, not algorithmic optimization.

7) Handling crisis with calm presence
--> When everything falls apart, people look for steady human leadership.

8) Knowing what not to say
--> Sometimes silence, patience, and timing matter more than perfect words.

9) Creating psychological safety for teams
--> Making people feel safe to fail, learn, and bring their whole selves.

10) Adapting your communication style to each person
--> Knowing Sarah needs direct feedback while Tom needs encouragement first.

AI handles the technical.
Humans handle the human.

Master both, but never forget which one matters most ?

Which of these EQ skills do you think is most important in your role?
