WHAT ENGINEERING CONSULTANTS ACTUALLY DO DAY-TO-DAY

Engineering consultants use their expertise to work on various projects for different clients/companies. They use their engineering knowledge to develop solutions specific to their clients' problems. Consulting engineers can either work in a consulting firm, or be sole traders.

WHY CONSULTING IS POPULAR WITH EE GRADS

Consulting provides engineers with the opportunity to work in a wide range of industries and projects, and enables them to experience both technical and business roles. A career in consulting involves working on a variety of projects in a short period of time, and offers high learning potential as well as exit opportunities.

TYPES OF CONSULTING WORK FOR ELECTRICAL ENGINEERS

Electrical engineering consultants can work in projects that involve:

These fields can be broken down into more specific areas like:

MAJOR FIRMS RECRUITING ELECTRICAL ENGINEERING STUDENTS

Many major firms like engineering consultancies and the Big 4 consulting firms regularly hire electrical engineers through vacation or graduate programs, as well as boutique consulting firms.

Major engineering consultancies:
• AURECON • JHA
• AECOM • GHD

Big 4 consulting firms where they primarily work in energy consulting, grid modernisation, and sustainability:
+ 3
• Deloitte
• PwC
• KPMG
• EY

WHAT MAKES EE SKILLS VALUABLE IN CONSULTING

Employers admire how electrical engineers can think analytically, and are able to approach challenges by utilising problem solving and critical thinking skills that are gained throughout university coursework.

Technical proficiency paired with project management abilities make electrical engineers highly desirable in the consulting industry as they provide credibility in their work.

CLIENT- FACING VS TECHNICAL WORK BALANCE

Most electrical engineers begin their consulting careers as primarily technical consultants; however, as skills are developed, many doors to other opportunities and roles open. The experience of each consultant varies and also depends on the size of the firm, whereby small firms would be more flexible, as opposed to established firms in which roles and responsibilities are more strict.
