Electrical Engineering

Robert Smith

Electronics / Electrical / Auto / Engineer
Maitland, New South Wales, Australia

Summary

Electrical engineer with four decades of experience across electronics, telecommunications, defence, rail, automotive and industrial systems. My career has ranged from Research and Development, testing and commissioning through to maintenance, troubleshooting, documentation and production support in both commercial and military environments. - - - I've contributed to projects involving security systems, medical equipment, military electronics, light rail vehicles, bus electrical systems and telecommunications infrastructure. Along the way I've enjoyed mentoring colleagues, improving procedures, solving complex faults and helping teams deliver reliable engineering outcomes. - - - Beyond industry, I remain active in the electrical engineering community through the UNSW EEnT Alumni network, supporting alumni engagement, student connections and knowledge sharing. I value collaboration, practical engineering insight and staying connected to the evolving future of electrical engineering.

Experience

UNSW EE&T Alumni

10 years

EE&T Alumni Committee Member - Volunteer

August 2020 - 2026 (6 years)

Sydney, NSW

Current . . .

-- Regular posts to Alumni on LinkedIn and Facebook about Electrical Engineering that includes campus events, history in society, experience and trends.

-- Attend committee meetings and School of EEnT events on campus such as Elsoc-Industry Nights, Elsoc-Alumni Nights, Elsoc BBQs and Thesis Poster Competition evenings.

This group also intends to:

- Create an environment for the alumni to network and to share experience, knowledge, and memories
- Reconnect alumni to the school of EE&T
- Develop better networking opportunities for alumni to collaborate across industries and be involved
- Establish a link between the school and various industries
- Reconnect the alumni together and create a collaborative environment, including networking and social activities
- Provide a platform for the alumni to give back to the school by any means comfortably possible

EE&T Alumni - Volunteer

July 2016 - 2026 (10 years)

Current . . .

- Interacting with Elsoc, the EE&T undergraduate society, via personal visits, LinkedIn connections and emails.
- Assisting Elsoc to share their campus events for Alumni to attend, share insights and work opportunities.

RobSmi Enterprises

Renovation Assistant

June 2019 - December 2019 (7 months)

Albury, NSW

- Renovation Assistant - Landscaping, Electrical, Painting across 2 properties.
- Repair and maintenance - house & roller doors, clotheslines, pavers, guttering.

RobSmi Enterprises

CRCOA Committee member and Registrar

January 2015 - December 2018 (4 years)

Sydney, New South Wales, Australia

-- CRCOA - "Combined RSL Centenary of ANZAC" Pipes & Drums

-- Registrar and camera man for specific NSW formed bagpipe & drums group.

-- Overseas tours in 2016 and 2018 - - Western Front for ANZAC commemorations.

-- Practices and online video sharing, management committee meetings, DVD production.

-- Representative RSL Pipe Bands were Burwood, Castle Hill, Cessnock, Ingleburn and Newcastle.

RobSmi Enterprises

Renovation Assistant

July 2012 - November 2014 (2 years 5 months)

Albury, New South Wales, Australia

-- House Renovations - Woodwork, Electrical, Plumbing, Painting, Welding and Gardening across 3 properties.

-- Technical advice, repair and maintenance.

Volgren Australia Pty. Ltd.

Auto Electrician

May 2009 - June 2012 (3 years 2 months)

Tomago, Newcastle

-- Updated daily progress production sheets to keep accurate building times.

-- Fault found dash electrics back to first principles as needed.

-- Identified and repaired semiconductor lamps and lights as needed.

-- Fitted Volvo core & extra looms along pneumatic and heating lines.

-- Maintained local floating stock of electrical equipment and bus parts.

-- Informed and assisted newly hired work colleagues with assembly of electrical system.

- Simplified and documented assembly & fitting production procedures.

UGL Limited Ltd - Rail

Electrical Engineer

March 2008 - June 2008 (4 months)

Newcastle, NSW

- Developed and typed-up specifications for new version of light rail vehicle (tram).

- Liaised with specialists of other fields in Melbourne and Hong Kong - draughtsmen, engineers (mechanical, structural, mechanical).

- Provided progress reports at critical stages to R&D Manager.

Tenix Defence Pty Ltd

Electronics Technician

April 1998 - January 2008 (9 years 10 months)

Bandiana, Victoria

- Maintained and serviced instruments in the workshop for military vehicles and field equipment (electrical, mechanical, optical).

- Worked with other teams in the maintenance facility (paint, hydraulics, mechanics, motor pool).

- Ordered parts, repaired equipment and documented to ISO standards.

- Calibrated & documented workshop test equipment (optical, electronic)

- Developed & applied procedures for the Huntron Tracker to different digital and analogue systems - automatic test equipment.

- Trained apprentices on local workshop equipment - optical, opto-electronic and electronic.

- Assisted M113 (Tank) production team with electrical testing & rectification work.

- Acted as an Electronics Team Leader when needed.

-- Attended in-house training courses - Fire, First-Aid, Radiation, Lasers, JSA, QA, Tank, (better stop here!)

Catalyst Recruitment Systems

Technical Officer

April 1996 - March 1998 (2 years)

Wodonga, VIC

-- Serviced and maintained equipment of the Australian Army - electronics, optical and mechanical.

-- Documented, repaired and tested equipment to Military Standards.

-- Department of Defence establishment.

Stanilite Electronics

Test Engineer

September 1994 - December 1995 (1 year 4 months)

Sydney, NSW

-- Designed, prototyped and implemented systems for manufactured lighting products.

-- Developed and implemented a go and no-go tester for printed circuit board assemblies.

-- Introduced Kanban system for inventory control from the quality circle in-house training.

Self-Employed

Consultant

April 1992 - September 1994 (2 years 6 months)

Sydney, New South Wales, Australia

-- Advised and assisted State Emergency Services in design of Tool Storage Systems.

-- Trained various Real Estate Staff in the use & backup of Accounting Software.

-- Advised, manufactured & installed storage systems in various childcare centres.

Zone Technology Pty Ltd
Engineer - Design & Development
April 1989 - April 1992 (3 years 1 month)
Sydney, New South Wales, Australia

- In a team, designed and developed hardware & software for the digital security camera system over dedicated telephone tie lines back to a 24 hour monitoring base station.
- Developed installation, programming and commissioning manuals for distributors.
- Developed and implemented a Change Note system for product alterations.
- Brought the camera system into production with drawings and parts lists for manufacture.
- Provided after sales support - queries, installation, bench and field repair.

DKS Pty Ltd
Test / Service Engineer
May 1988 - April 1989 (1 year)
Sydney, New South Wales, Australia

- Repaired, tested and serviced in-house developed building access control systems.
- Enhanced test procedures for each security key reader and printed circuit board assembly.
- Applied Fluke troubleshooting equipment to repair production boards down to component level.
- Assisted in monthly quality control and monitoring work-in-progress stocktakes.

Telco Pacific
Electrical Engineer
May 1987 - March 1988 (11 months)
Sydney, New South Wales, Australia

- Repaired and serviced audio & video communication and security equipment.

- Developed a customer service and equipment register using a database software - dBase 3+.
- Presented in-house training courses on PABX equipment to distributors and installers.
- Produced monthly reports for the service department.
- Developed a cable polarity checker and audio intercom for PABX cabling team across multi-floors.

UNSW Electrical Engineering & Computer Science

Professional Officer

March 1987 - April 1987 (2 months)

Sydney, New South Wales, Australia

- To troubleshoot and document a non-functional stand-alone digital signal processing run board that will execute the Texas Instruments TMS32020 programs.
- Help requested by my undergraduate thesis supervisor.
- Schematic diagram drawn up with adjustments, test programs, timing diagrams created and printed.

Linbrook International Pty Ltd

Field Service Engineer

August 1986 - March 1987 (8 months)

Sydney, New South Wales, Australia

- Serviced clinical and medical equipment in hospitals and dedicated laboratories.
- Produced monthly work-in-progress reports using the Lotus 1-2-3 spreadsheet package.

Appliance Control Systems

Engineer - Research & Development

May 1986 - July 1986 (3 months)

Sydney, New South Wales, Australia

-- Designed, developed and Prototyped SMD control circuitry for Household Appliances & Whitegoods such as a Hand food mixer, Vulcan room heater.

Standard Telephone and Cables Pty Ltd

Test Engineer

December 1985 - May 1986 (6 months)

Sydney, New South Wales, Australia

-- Produced a Repair Guide from my log book of Faults Found for Manufactured Circuit Cards failing their initial automatic equipment test.

Education

UNSW Electrical Engineering & Telecommunications

BE Elec. (UNSW), Electronics & Communications · (March 1979 - November 1985)

North Sydney Technical College

Cert Elec Eng, Electronics & Communications · (February 1983 - November 1983)

Granville Boys High

Higher School Certificate · (1973 - 1978)
